Innovation Policy and Investment for Growth

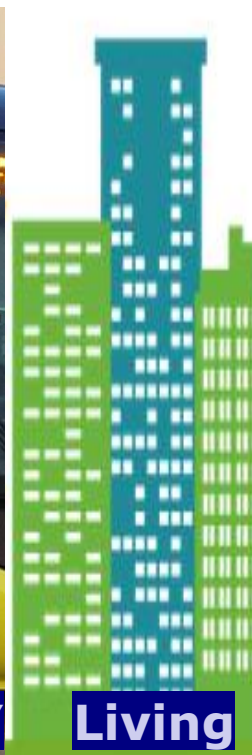

President Ursula von der Leyen

*„...contribute to a comprehensive **long-term strategy for Europe’s industrial future**. This should cover all aspects that affect industry and its **competiveness**, from **investment** and public procurement to trade, **skills, innovation** and **supporting** small and medium-sized businesses (**SMEs**).”*

*„...lead the Commission’s reflections on issues such as **Europe’s technological sovereignty in key value chains**, including in the defence and space sectors, common standards and future trends. ”*

Sustainable Development Goals with overarching priority under New Commission

- Climate goals need a holistic **trans-sectoral approach**
- Solutions to break silos between utilities, electricity, mobility, waste, living
