

Data? It's all about Access – Mariane ter Veen

Workshop Policies to Support Open Data Marketplaces – 29 January 2020

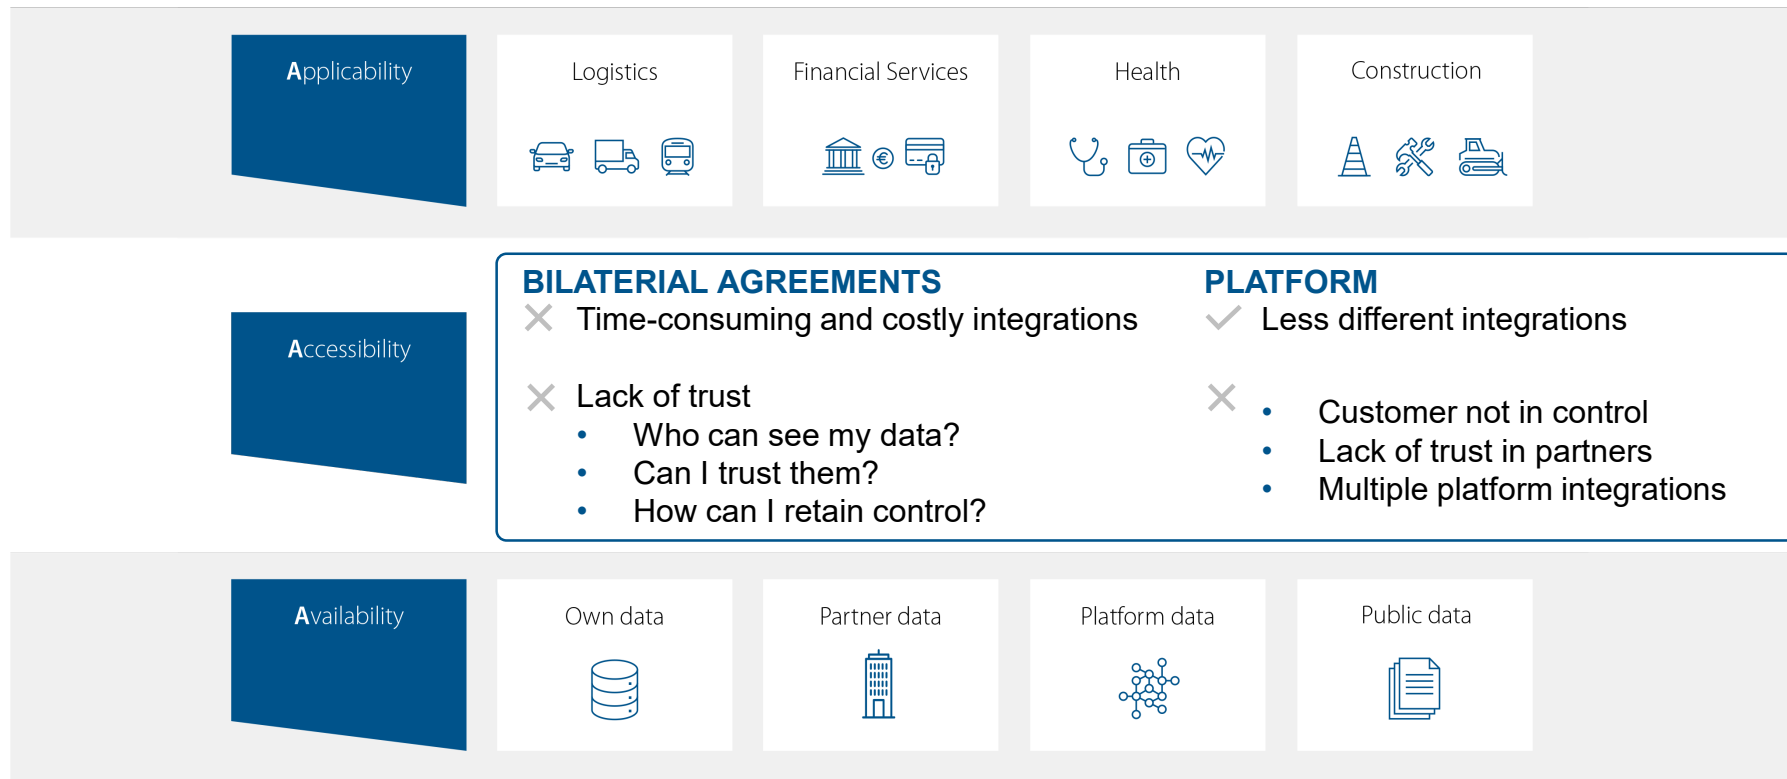

To enable valuable Applications of data, Available data needs to be Accessible – The INNOPAY Triple A model

Triple A Model

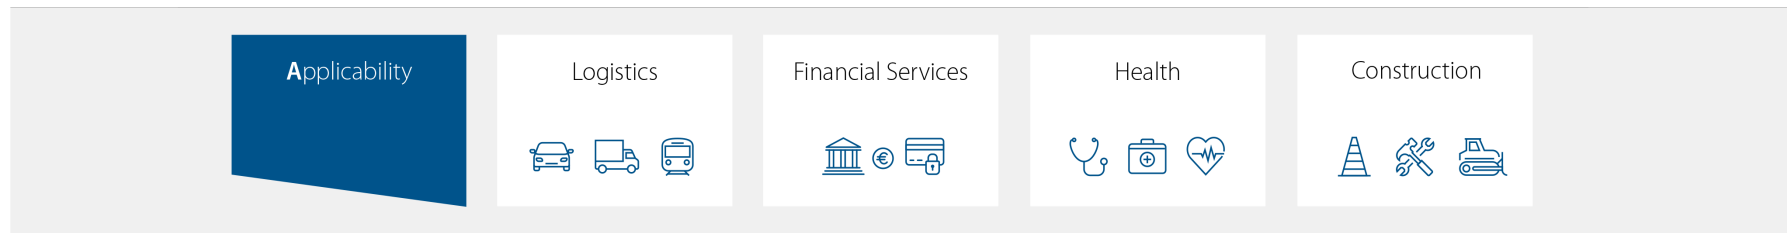

Current paradigms: bilateral agreements and platforms; sub-optimal solutions for the accessibility of data

Triple A Model

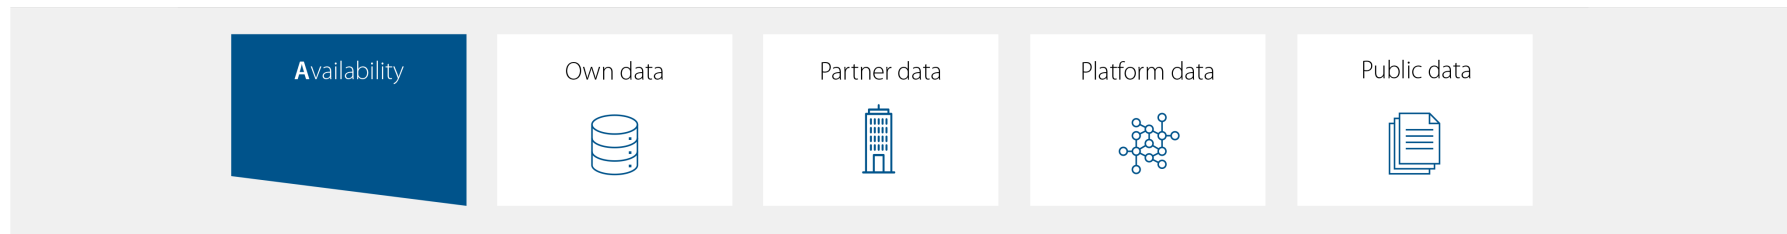

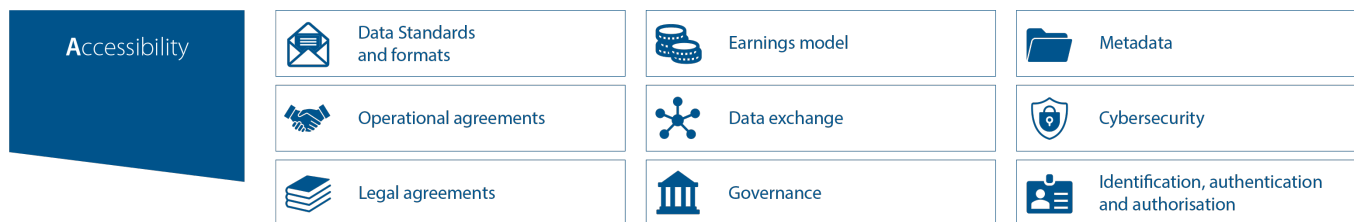

The INNOPAY Triple A model & INNOPAY nine building blocks for data sharing

Triple A Model

Accessibility of data sharing is based on 9 building blocks

iSHARE

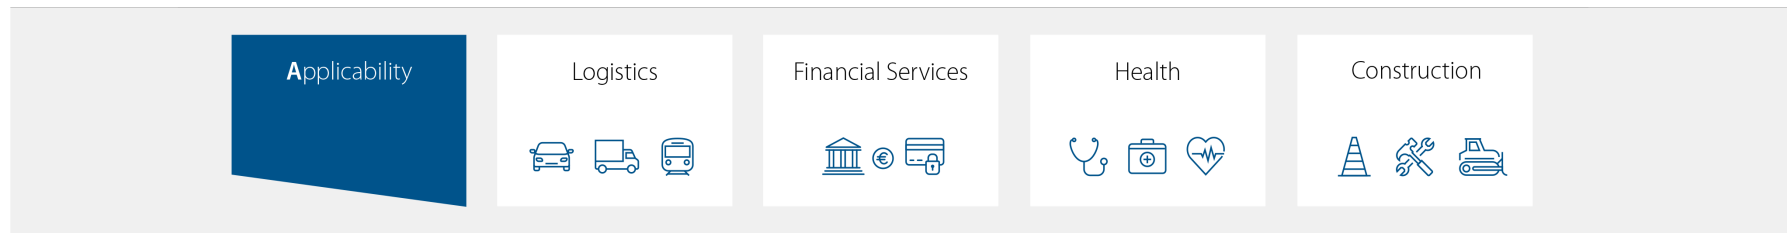

iSHARE

iSHARE is a **uniform set of agreements** or **Scheme** that enables organisations to grant each other **access to their data in a standardized way**.

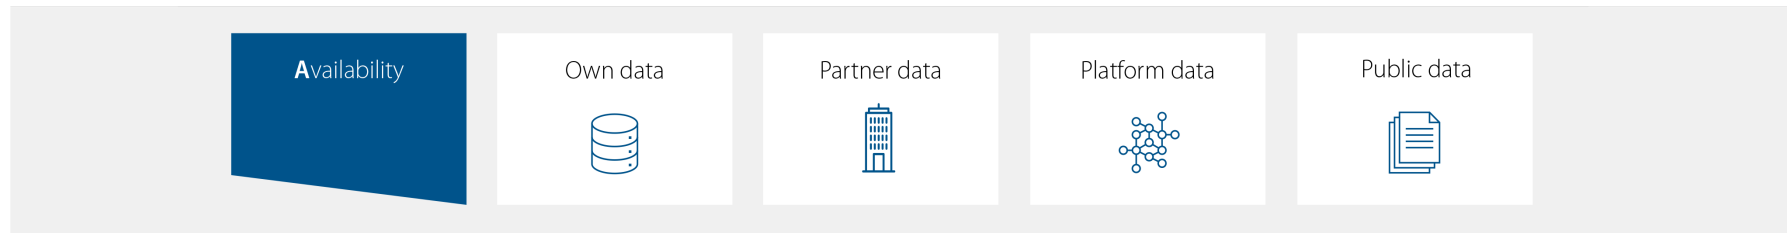

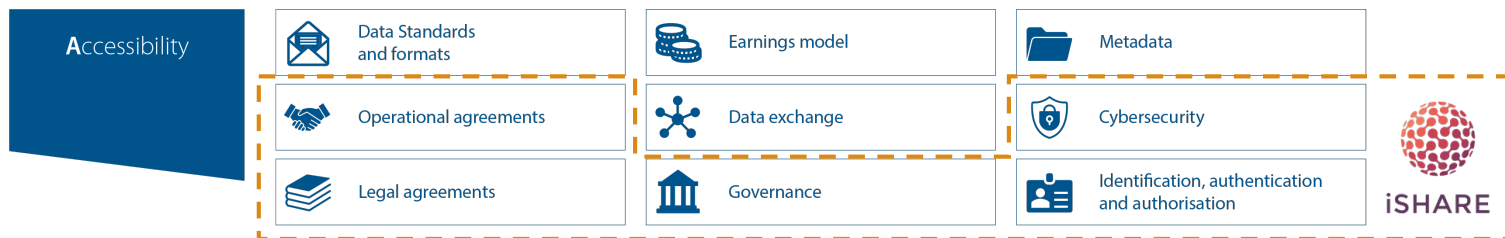

Since all organizations which adhere to iSHARE have implemented the same methods for **identification, authentication and authorization**, they do not need to continually make new, bilateral data access agreements whenever they want to **share data**.

Trust Schemes: agreements about the INNOPAY nine building blocks for data sharing can realise any-to-any accessibility

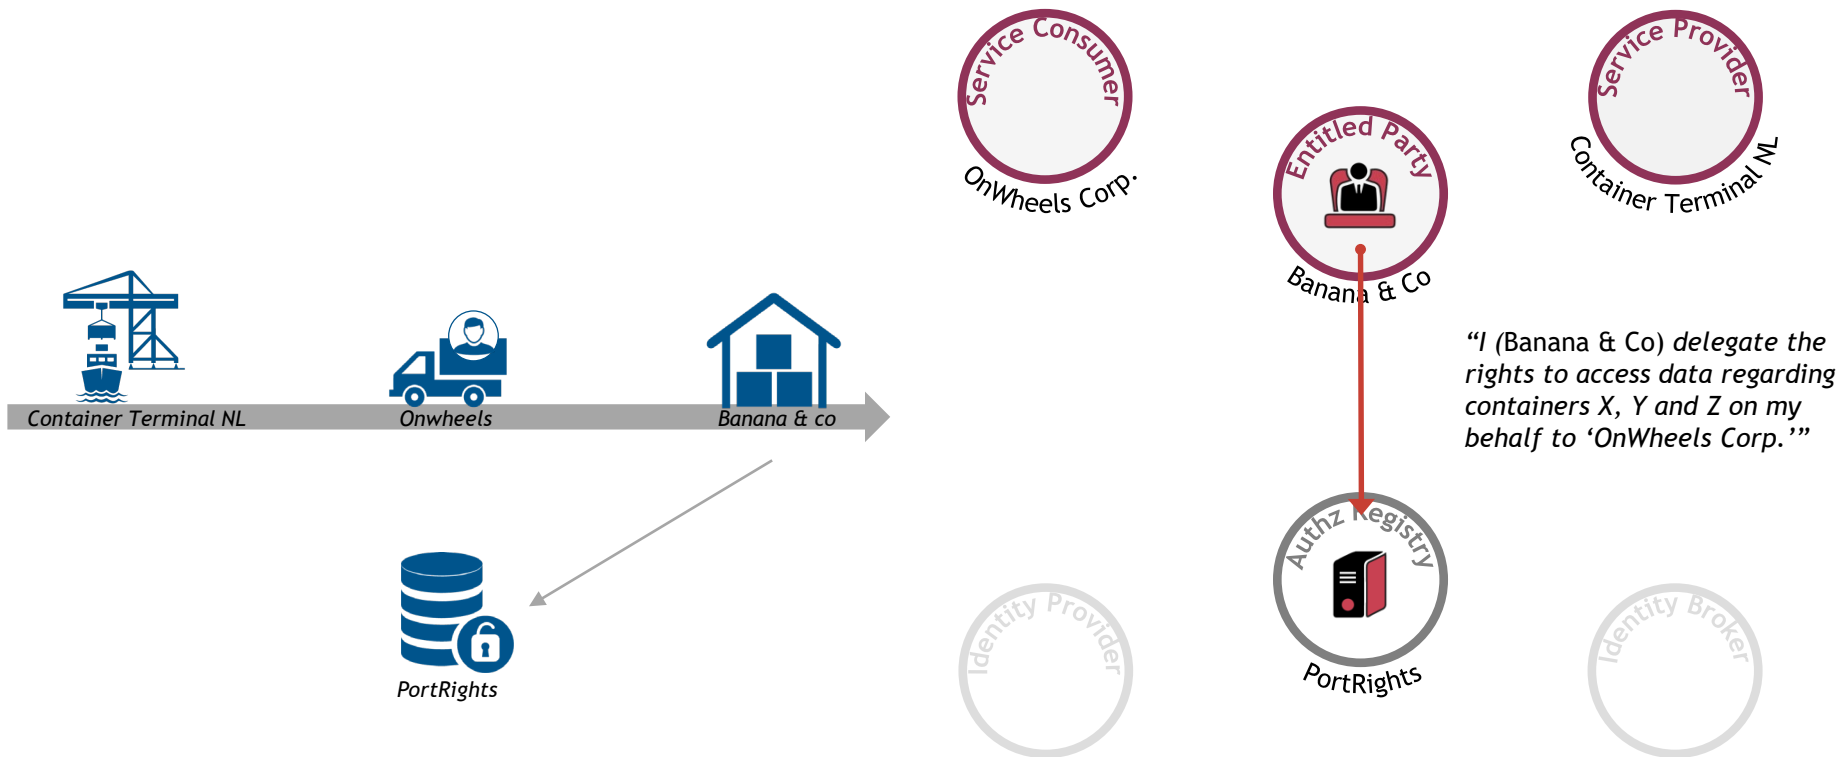

Triple A Model

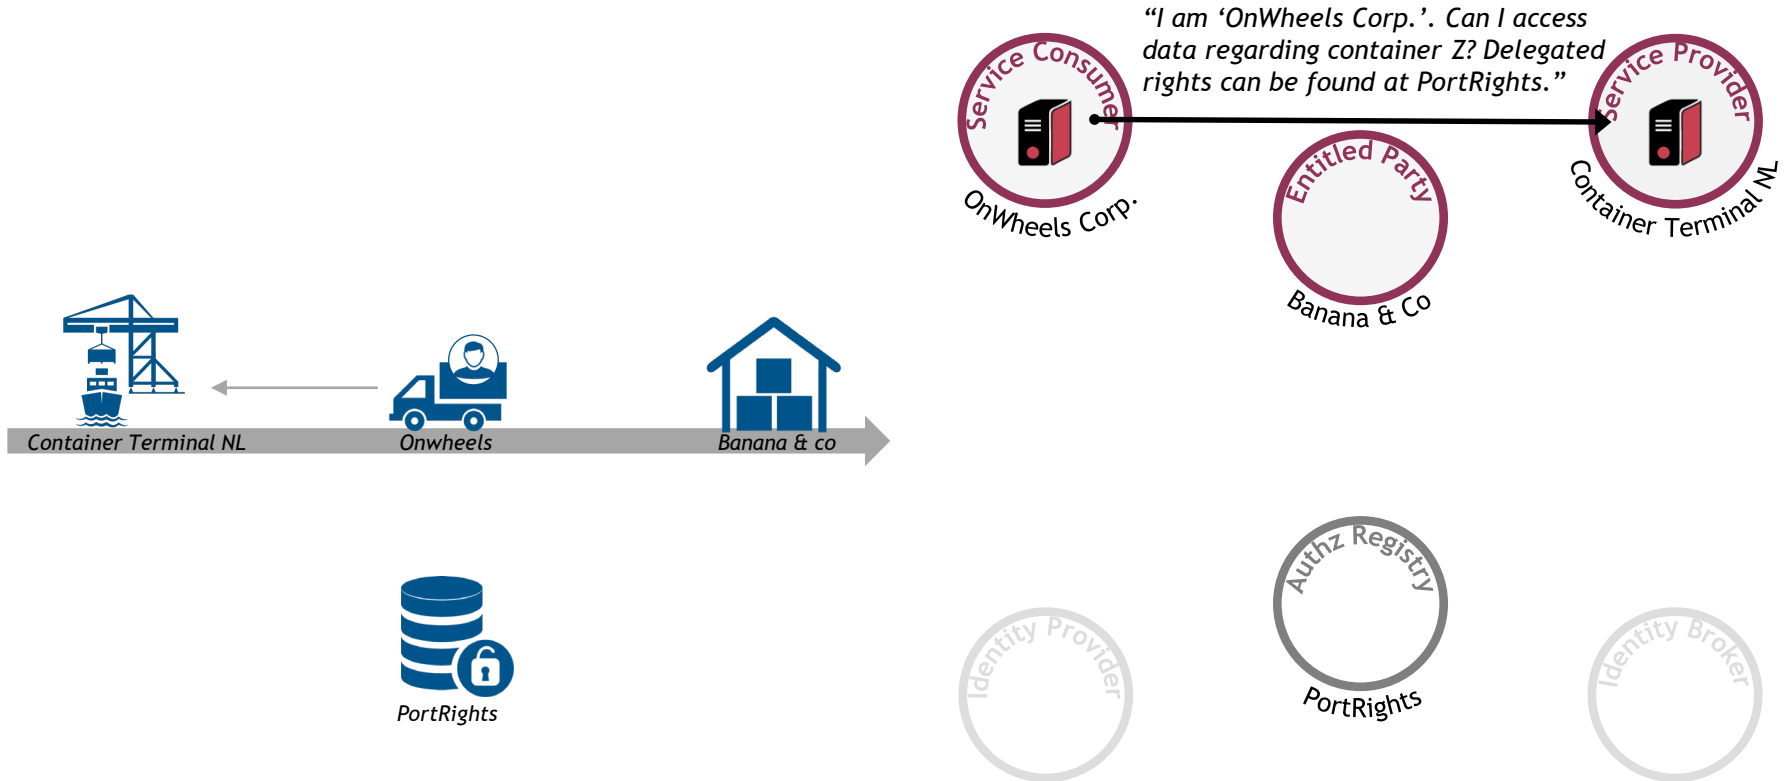

Accessibility of data sharing is based on 9 building blocks

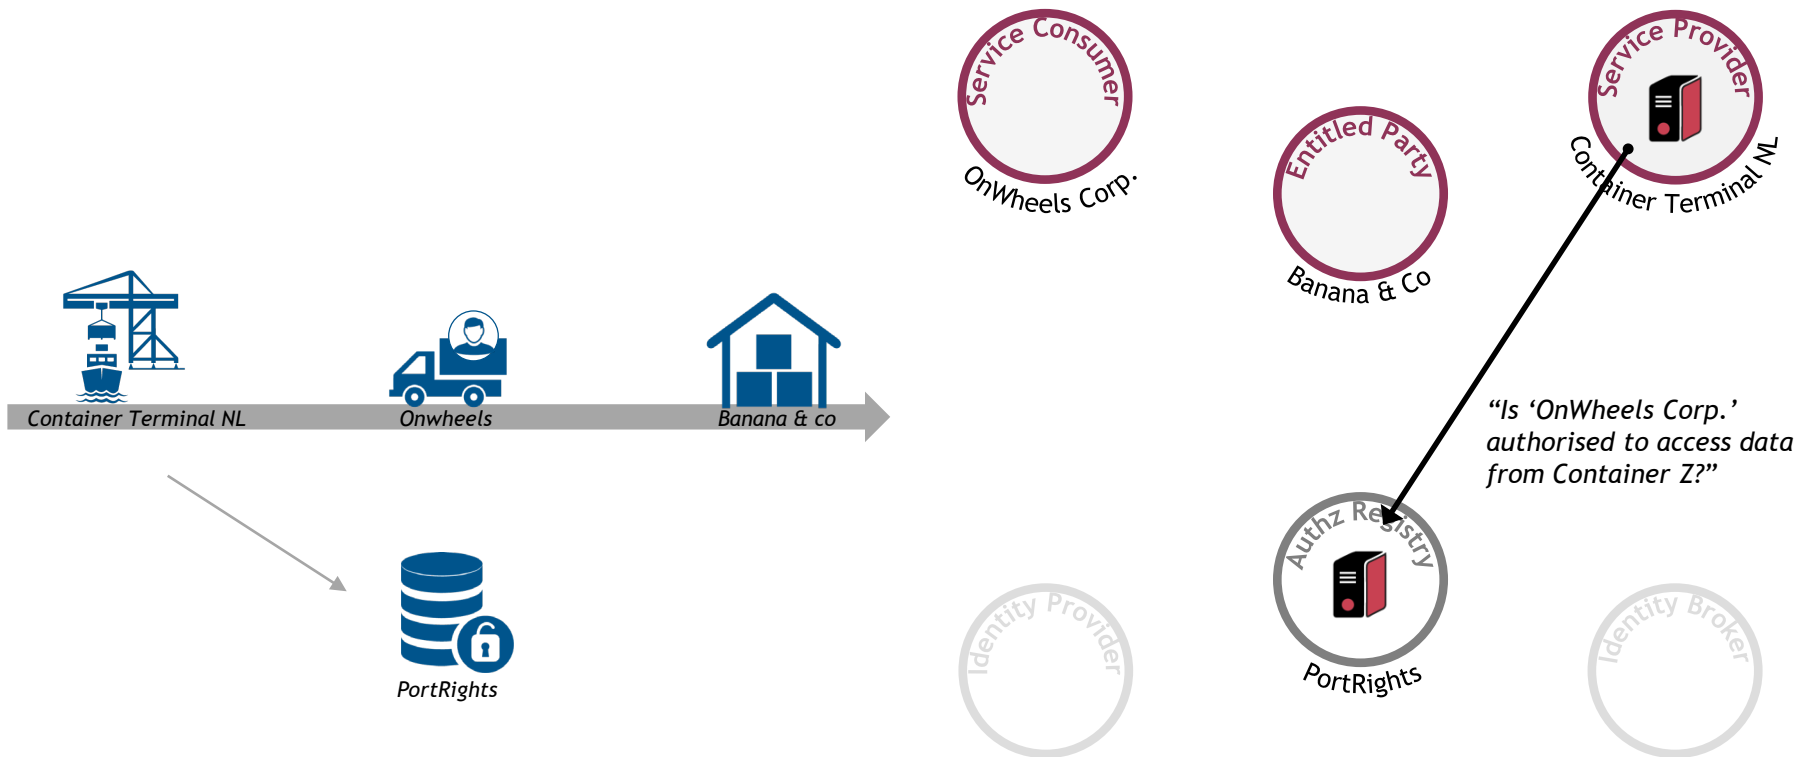

OnWheels Corp wants to access container data at the terminal on behalf of Banana & Co

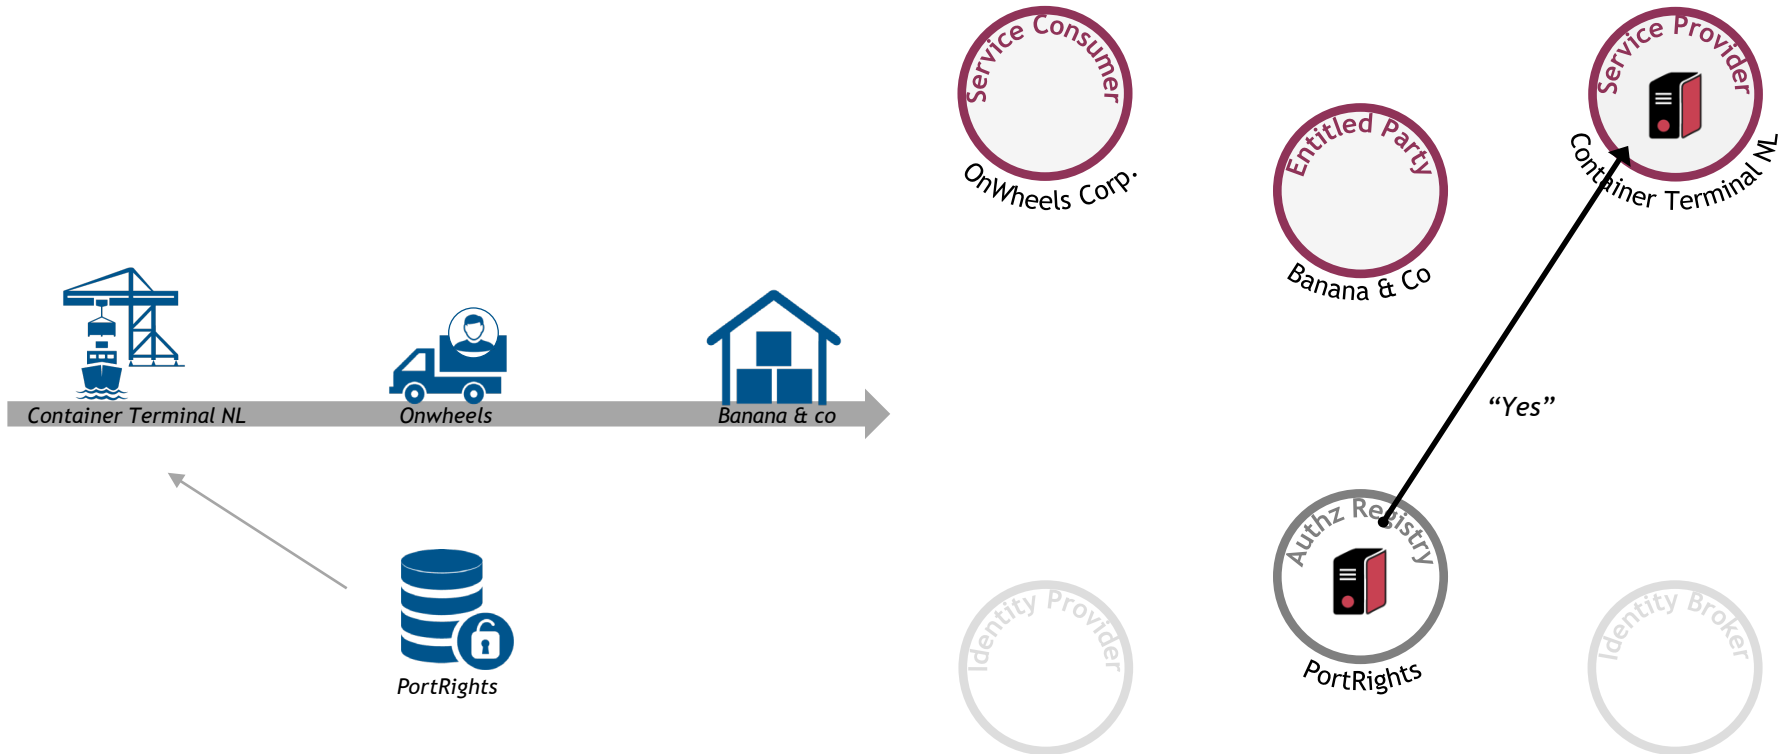

OnWheels Corp wants to access container data at the terminal on behalf of Banana & Co

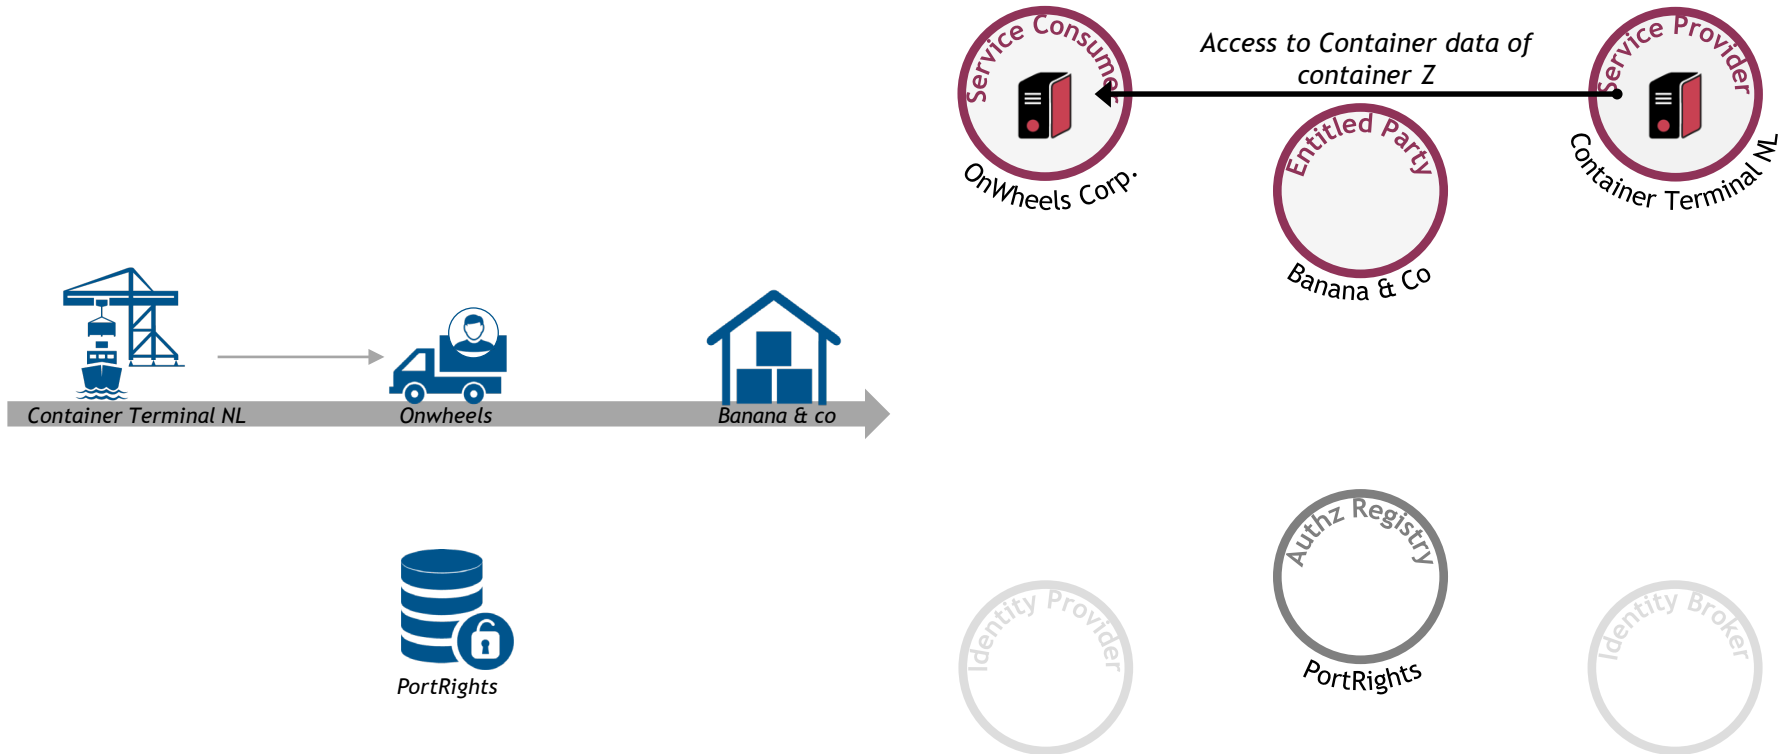

OnWheels Corp wants to access container data at the terminal on behalf of Banana & Co

OnWheels Corp wants to access container data at the terminal on behalf of Banana & Co

OnWheels Corp wants to access container data at the terminal on behalf of Banana & Co

INNOPY facilitated iSHARE's co-creation, by the sector, for the sector, until transition to iSHARE Foundation
